Dear Familie,

This family has four members. Father, mother and two children. Husband's name is Ki Samrith. He's 33 years old. He's a gardener. His wife's name is Lach Lang. She's 32 years old. She's a housewife. They have two children. There is one boy and one girl. Before he got this well, he uses his aunt well. When he uses the first time everything was good, but after long time his aunt felt unhappy because when he came back from work he grew some vegetables and every day he needs to use a lot of water more and more water every day. And his aunt warning him that if he needs to grow many kind of vegetables he must build his own well, but he's very poor because his salary never enough. That's why he needs to grow vegetables. If his vegetables grow well, he could get these vegetable some for selling and some for eat every day. And he tries to find many way to build one well on his land, but the well cost a lot of money for him (too expensive). It is over his ability. He never dreams to have a beautiful well like this. He just dream to have well that have water for him to use.
